# TUBE LASER

Tectron™ has expanded its fabrication services to now include a Fiber Tube Laser! Our state-of-the-art laser can cut a wide variety of tube with high quality cuts and etch designs into your tubular products. The tube is supported and guided during each phase of the cutting process and ensures maximum accuracy and protects the tube from scratches.

## Tectron™ Laser Capabilities

- Round tube: ½" - 4.5"
- Square tube: ½" x ½" - 3.9" x 3.9"
- Minimum WIP Length: 10' 6"
- Maximum WIP Length: 21' 3"
- Maximum Finished Length: 14' 7"
- Maximum Wt./Ft: 9 lbs.

Our Tube Laser can combine multiple fabrication steps such as drilling, notching, punching, and machining in one easy step.

*For more information regarding our tube laser capabilities, call 800-882-5543.*
