

DIAMOND BACK EMBOSSSED TUBE

For over two decades, Allied Tube & Conduit® has served the Poultry industry and developed our Diamond Back tube to be used as perch stands for egg laying facilities to promote Happy Chickens.

The Diamond Back Embossed design prevents chickens from slipping unlike the typical industry standard smooth perch stands, and it also stands up against the elements and bird droppings. The embossed design also keeps the chicken's feet clean.

Try our Diamond Back Embossed tubing today! Contact your local sales rep or visit atkore.com/atcm

The Allied Advantage

- **Design** - The Diamond Back embossed design on our tube prevents the chickens from slipping unlike the industry standard smooth surface perch stands
- **Versatility** - We offer a wide variety of tubular products to support water and feeder systems
- **Unsurpassed Corrosion Protection** - Gatorshield® is more resistant to rust than any competitive tube product. The Flo-Coat® process makes the difference!
- **Ease of Fabrication** - No chipping or flaking when bending and/or flattening
