

TUBE LASER FABRICATION

Tectron™ Expanded Fabrication Services

Tectron has expanded its fabrication services to now include a Fiber Tube Laser! Our state-of-the-art laser can cut a wide variety of tube with high quality cuts and etch designs into your tubular products. The tube is supported and guided during each phase of the cutting process and ensures maximum accuracy and protects the tube from scratches.

Our Tube Laser can combine multiple fabrication steps such as drilling, notching, punching, and machining in one easy step.

Tectron Laser Capabilities

- Round tube: ½" - 4.5"
- Square tube: ½" x ½" - 3.9" x 3.9"
- Minimum WIP Length: 10'6"
- Maximum WIP Length: 21'3"
- Maximum Finished Length: 14'7"
- Maximum Wt./Ft: 9 lbs
